INSTALLATION STEPS

Step 1: Connect the ④ Upright Column and ⑤ Upright Column Base, and install them onto the ① Folding Bucket.

Step 2: Install the ⑦ Overflow Spout into the hole on top of the Bucket. Ensure the waterproof ring is placed on both sides of the Bucket.

Step 3: Install the ⑥ Drain Switch Valve into the hole below the Bucket. Ensure the waterproof ring is placed on both sides of the Bucket.

Step 4: Thread one end of the ⑬ Power Adapter through the Bucket and connect it to the ⑭ Water Pump. Cut the ② Rubber Pipe to the required length, connect one end to the Water Pump, and thread it out of the Bucket.

Step 5: Install the check valve at ⑨ to effectively prevent siphoning of water.

Step 6: Connect the other two sections of ② Rubber Pipe via the ⑧ Locking Switch Valve to control the water flow.

Step 7: Connect the ⑪ Tube Connector to the end of the ② Rubber Pipe. Cut the ③ PVC Pipe to the required length and install it above the Tube Connector.

Step 8: Connect the ⑫ Drip Emitter to the end of the ③ PVC Pipe and insert it into the soil. Connect the ⑩ Locking Plug to the end of the ② Rubber Pipe to complete the installation.

Tips:

1. If installing the PVC pipes onto the connectors is challenging, you can use a hairdryer to heat the pipes for easier insertion into the connector ports.
2. Please cut the PVC hose according to your actual growing environment and needs.

INSTRUCTIONS FOR USE

1.Choking Hazard

The product may pose a choking hazard due to small parts or breakable parts. It is recommended that children under 5 years old avoid using this product.

2.Pipeline Configuration

Arrange drip irrigation pipes around plants in a uniform manner to ensure even water distribution and eliminate irrigation blind spots.

Prevent compression of drip irrigation pipes by plant roots or other obstacles to maintain optimal irrigation efficacy.

3.Maintenance

Conduct periodic cleaning of drip irrigation pipes and drippers to prevent blockages and uphold irrigation effectiveness.

Regularly check for leaks in pipelines and junctions, promptly addressing any identified issues to prevent water loss.

Ensure children and pets are kept away from the product to prevent potential accidents!
